-  5S OTOMOTIV TEKSEN BILISIM
Back-End Developer
-  GOSB TEKNOPARK
Web Developer

EXPERIENCE

- **Python Django Web Developer**

Sosyalgi Agency İstanbul/Turkey: 2020 - 2022

Working for clients projects with following tools and technologies:

Python, Python Django Framework, HTML&CSS&JS, MSSQL Server, MySQL Server, Wordpress, SEO, Microsoft Azure, Visual Studio Code, MSSQL Configuration Manager

We have made plenty of web sites by wordpress and full-stack e-commerce web projects with python django. We have made web designs by using HTML&CSS&JS.

- **Web Developer & Designer**

GOSB Teknopark Kocaeli/Turkey: 2022 - 2023

Working for clients projects with following tools and technologies:

HTML&CSS&JS, Wordpress, SEO.

First of all, we created the company's own website (gosbteknopark.com). We designed and published our customers' websites according to their requests.

- **.NET Software Developer**

Midenas D.O.O. Novi Sad/Serbia: 2023 - Present

Working on different project with following tools and technologies –

.Net, .Net Core 6.0, .Net Framework 7, ASP.NET Core Web API, Entity Framework, NUnit SwaggerUI, Postman, Redux Dev Tools, Microsoft SQL Server, MS SQL Management Studio, MS SQL Configuration Manager, Visual Studio, Visual Studio Code.

The projects I worked on were guided by an agile methodology (SCRUM) using Azure DevOps/Git to plan, track, and manage the development cycle.

- **Personal Clients**

I have had customers who have visited my site before and received recommendations from my previous customers. I have build E-commerce websites, portfolio websites, real-estate websites, corporate websites for university and companies, school websites and etc.

PROJECTS

Movie recommendation app

2018

Project Description A mobile application that includes movie recommendations, movie ratings and filtering.

Project Role Software Developer

Responsibilities My task in the project was to create the interface to be displayed for users and to perform logic operations. At the end of the project, we achieved our goal and prepared a small-scale application that users can easily use.

Tools & Technologies MySQL Server, Flutter, Sql Queries, Android Studio

Rent a Car Desktop Application

2019

Project Description A Rent a Car System for Desktop Users. This project included management of users, cars, booking, and brunches.

Project Role Back-End Developer

Responsibilities My task in the project was to establish logic on users and the car rental system and to prepare the designs of the pages where these operations would be performed.

Tools & Technologies C#, MSSQL Server, Visual Studio, Github, Microsoft SSMS

ThePalmz E-Commerce Web Project

2021

Project Description Our goal in this web project was CRUD operations for products, login-register and authorizations, 3 different user type and admin page for management users, product, and page contents. In addition we added payment method by using iyzico payment modules. Our purpose was to create a web project that has all functions working and is manageable for the seller.

Project Role Back-End Developer & Front-End Developer

Responsibilities My task in this project was to prepare the background methods and front-end designs of the fashion store e-commerce website. Test the codes and implement payment system and deploy the project.

Tools & Technologies Python, Python Django, MySQL Server, PyCharm, HTML & CSS & JS, Chart.js, Azure DevOps, Git, Amazon Servers

Project Description

We have developed a web project that includes making appointments with professors, contacting the department secretary, tracking grades, describing university news, accessing course notes and contents, uploading CVs, downloading and viewing uploaded CVs, creating a transcript request from the department, and internship and job-internship postings by professors. Our goal was to make every process faster for university department. In addition, for the user information on the site, we have listed how to transfer information to the user with chart.js and make some predictions for users with machine learning.

Project Role Software Developer

Responsibilities

My task in this project was to prepare the background methods and front-end designs of the Transcript document query page and pages with the appointment system, graphics for users, and an application for new users that will estimate the user recruitment time with machine learning.

Tools & Technologies Python, Python Django, MySQL Server, PyCharm, HTML & CSS & JS, Chart.js, Azure DevOps, Git, Amazon Servers

Company Portfolio MVC Web Project

2023

Project Description

This MVC project is a single-page agricultural company promotion web project with an admin panel, admin user operations, and the aim of dynamically changing every field on the page. It also includes reporting examples. It can also be used for different purposes.

Project Role Back-End Developer & Front-End Developer

Responsibilities

My task in this project was to create an admin panel and enter and edit dynamic content for the sections, create admin user transactions, prepare the reporting section, prepare the page designs and create the architecture. The aim was to ensure the implementation of the SOLID structure, create partials accordingly and pay attention to clean code.

Tools & Technologies C#, Asp.net Core 6.0, Asp.net Core MVC, Microsoft SQL Server, Git, Entity Framework Core, Html & Css & Js, Bootstrap, Razor View

LMS Platform - Midenas

2023

Project Description

Designed to represent a fully-fledged software development simulation that can potentially be used as a base to future projects and ideas.

Project Role Backend Web Developer

Responsibilities

I worked on solution implementation of the API logic and systemic layering. I was tasked to creating endpoints and underlying logic for handling entities, implementing login authentication and roll-based authorization. Together with the team, I was tasked to demonstrate the development progress of the project on regular make-believe client meetings.

Tools & Technologies C#, .NET 6 Core Web API, Microsoft SQL Server, Entity Framework, Azure DevOps, Git

Project Description	I spearheaded the development of a captivating 3D portfolio website that seamlessly integrates Three.js with React and Vite. The project aimed to showcase a dynamic and visually immersive portfolio, leveraging the power of Three.js for creating stunning 3D graphics and animations. The combination of React and Vite was chosen for their efficiency in managing the application's state and delivering a fast, optimized user experience.
Project Role	Front-End Developer
Responsibilities	As the developer, my role involved conceptualizing the project, making design decisions, and implementing the core functionality. I worked closely with the design team to ensure the seamless integration of 3D elements into the portfolio layout. Additionally, I was responsible for optimizing performance and ensuring a smooth user experience across various devices.
Tools & Technologies	React + Vite, Three.js, Html, Css, Js, Visual Studio Code, Git,

Real-Estate Asp.net Core 8.0 + MVC Project

2023

Project Description	I have developed a comprehensive Real Estate web project using ASP.NET Core 8.0 for the backend. The project aimed to provide a robust platform for real estate transactions, offering features such as property listings, user authentication, and real-time updates using SignalR.
Project Role	Back-End Developer & Front-End Developer
Responsibilities	Implemented the backend, utilizing Web API to expose endpoints for data retrieval and manipulation. Developed the user interface using Bootstrap, CSS, HTML and Razor Pages to create a responsive and visually appealing frontend. Integrated SignalR to provide real-time updates, enabling users to receive instant notifications on property changes, messages, or other relevant events. Worked on database integration, utilizing Dapper to manage data models and interact with the database.
Tools & Technologies	C#, Asp.net Core 8.0, Asp.net Core MVC, Microsoft SQL Server, Git, Dapper, Html & Css & Js, Bootstrap, Razor View

Hotel Management Asp.net Core 6.0 + MVC Project

2024

Project Description	I have developed a Hotel web project using ASP.NET Core 6.0 for the backend. The project aimed to create a hotel booking system and management for admin panel. The Features are rooms listing, user authentication, booking approve, user roles and etc.
Project Role	Back-End Developer & Front-End Developer
Responsibilities	Implemented the backend, utilizing Web API to expose endpoints for data retrieval and manipulation. Developed the user interface using Bootstrap, CSS, HTML and Razor Pages to create a responsive and visually appealing frontend. Worked on database integration, utilizing Entity Framework Core to manage data models and interact with the database.
Tools & Technologies	C#, Asp.net Core 6.0, Asp.net Core MVC, Microsoft SQL Server, Git, Entity Framework Core, Html & Css & Js, Bootstrap, Razor View, Github, Git, Postman, Swagger

SKILLS

Knowledge of relational database management systems (Microsoft SQL Server, MySQL), markup languages (XML, HTML). Experience with integrated development environments (Microsoft Visual Studio, Eclipse) with different libraries and NuGet packages. Worked with embedded Git and Azure DevOps functionalities. Applied use of well-known design patterns in C# and Java languages in various situations.

Programin Languages & Technologies

- C#
- Python
- Html & Css & JavaScript
- React
- Wordpress

Frameworks

- Python Django Framework
- Asp.net Core Web Api
- .Net
- Entity Framework
- Asp.net Core MVC
- Dapper

Relational Database Management System

- Microsoft SQL Server
- MySql Server

Development Tools

- Visual Studio
- Visual Studio Code
- Sublime Text
- Azure DevOps, Git
- GitHub, GitLab
- Swagger, Postman
- SQL Server Management Studio
- PyCharm

COURSES

- Object Oriented Programing Course
- Oop Basics with C#: N-Tier Artchitecture Step By Step (Udemy)
- Asp.Net Core Api - Rapid Api ve Api Consume (Udemy)
- Data Structures and Algorithms
- Relational Database
- Component Based Development
- Web Programing
- E-Commerce
- Wordpress & SEO

WEB SITES

I have published plenty of website by using wordpress for my personal clients & my previous company's clients. I have designed e-commerce web sites, plumbing web sites, real-estate web sites, one-page advertising web sites, portfolio web sites etc.
